June 2009

Dear Jimmy,

With so much going on in my schedule, it was difficult for me to work hands on with our transition from one office building to our new corporate office. It was my pleasure to have you represent me through this project. For 6 months, you productively handled majority of the issues on my behalf as the President of Houston Acoustics & Drywall.

You provided construction management and on site inspections of the ground up structure and site work that was constructed by the developer. You also provided management coordination of architectural drawings for interior build out from conceptual layout through permit working directly with the architect; in addition, the design of MEP with MEP contractors from inception through permit. You took on the responsibility of completing the interior build out including design build MEP's through MEP contractors which was done impressively. You were on schedule with all issues needing decisions provided in advance in order to not affect the completion schedule.

I recommend you, Jimmy Gildart, without reservation. I am confident you what it takes to not only exceed others' expectations, but excel in a timely manner with the utmost respect as to how your clients want the job done. I thank you Jimmy for all of the time and effort put into this project and you are greatly appreciated.

Cordially,

David Maniscalco
President
Houston Acoustics & Drywall
